The chain-saw image

the dumb image

the dirty boots image ...

the grunt image ...

Watch out for self-fulfilling prophecy

One rather typical example

Holzarbeiter bei der Arbeit: Die Jungwuchspflege ist entscheidend für die Stabilität eines Waldes gegen Naturkatastrophen und Schädlingsbefall. (Foto: Stroß)

Ein gesunder Wald braucht Pflege

Gemeinsame Forstverwaltung für Jagdbergregion in Planung

Satteins (str) Die Gemein- chende Tätigkeiten aus- gesunder Bestand aufwächst“,
den der Jagdbergregion pla- führen“, erläutert Bürgermei- so Bürgermeister Lang weiter.

Let's summarize ...

- **Most academic foresters share the same sources of knowledge, which have often been more characterized by dogmatism and ideology than by scientific rigour.**

Let's summarize ...

- Most academic foresters share the same sources of knowledge, which have often been more characterized by dogmatism and ideology than by scientific rigour.
- **Forest science has the image of being traditional, conservative and silva-centric.**

Let's summarize ...

- Most academic foresters share the same sources of knowledge, which have often been more characterized by dogmatism and ideology than by scientific rigour.
- Forest science has the image of being traditional, conservative and silva-centric.
- **The image of foresters in university environments is not especially brilliant either.**

What are our chances?

- **Treat forests as a part of the wider landscape**

What are our chances?

- Treat forests as a part of the wider landscape
- **Declare non-timber forest products as public goods**

What are our chances?

- Treat forests as a part of the wider landscape
- Declare non-timber forest products as public goods
- **Become manager of natural resources and land use**

What are our chances?

- Treat forests as a part of the wider landscape
- Declare non-timber forest products as public goods
- Become manager of natural resources and land use
- **Think in a inter- and trans-disciplinary way**

What are our chances?

- Treat forests as a part of the wider landscape
- Declare non-timber forest products as public goods
- Become manager of natural resources and land use
- Think in a inter- and trans-disciplinary way
- **Search for new forms of international co-operation**

What are our chances?

- **Follow these agendas (global governance).**

What are our chances?

- Follow these agendas (global governance).
- **Use international networks.**

What are our chances?

- Follow these agendas (global governance).
- Use international networks.
- **Offer public services and advise on policy.**
