2ND CONIFER GENOME SUMMIT 16-18 JUNE 2014

Jointly organized by
the White Spruce SMarTForests Project (Canada) and
the Norway Spruce Genome Project (Sweden)

Open to all members of the forest genomics community

The 2014 Summit will facilitate updates on the most advanced approaches in conifer genome sequencing, assembly and annotation, as well as updates on the interpretation and practical application of the information gleaned from conifer genomes. The meeting program will include invited and contributed presentations and ample time for discussions.

Based on accommodation availability, attendance will be limited to about 70 participants. Please register early to secure your spot.

Registrations will open in March 2014.
We look forward to seeing you at the Summit!
